children's dentistry Children's Dental Emergencies Dental emergencies can be traumatic for everyone. The most important thing to remember is not to panic. If a child experiences any loss of consciousness, please visit your local hospital emergency department immediately. In a children's dental emergency, timing is very important. If your child experiences a dental emergency follow these steps, and book in with your paediatric dentist as soon as possible. In the meantime, stick to a soft diet and manage any pain with Panadol or Nurofen. Steps to take in a children's dental emergency Knocked out tooth You must ACT QUICKLY. It is essential that the tooth be placed back in the socket within 20 minutes of the accident. Take the knocked out tooth and hold the tooth by the crown. Do not touch the root. Rinse briefly under water and immediately place the tooth back in it's original place, despite any bleeding. Gently hold the tooth in place. and lower teeth. better outcome. To keep the tooth in place, close the mouth with a piece of gauze, clean cloth or napkin between the upper It doesn't matter if the tooth is the wrong way or not aligned, it just needs to be back in the socket to ensure a better outcome If the tooth cannot be placed back immediately, it needs to be kept moist by submerging it in milk or saliva (parent or child's). Bring the submerged tooth to the dentist. Call and visit us immediately Loosened teeth or teeth have moved This is an emergency and needs immediate care by a dentist as soon as possible. Try to move the teeth gently to their original position. Close the mouth with a piece of gauze, clean cloth or napkin between the upper and lower teeth. Call and visit us immediately. Broken or fractured tooth This is not an emergency but definitely needs treatment within 24 hours. Try to find the broken piece and store it in water or milk (do not keep it dry). Call us and book in the earliest possible appointment. Baby tooth trauma If a baby tooth is knocked out or broken do not try and put it back in the socket. Submerge the tooth or tooth fragment in milk and bring it with you to your appointment. Call us and book in the earliest possible appointment with a paediatric dentist. Download our guide to children's dental emergencies Click here It is important to always attend follow-up appointments to monitor the teeth, as well as maintaining good oral hygiene. Gently brush the injured tooth or use a moist cotton swab to keep the injured site clean.
