Employing science and artistry at Smile Solutions Smile Solutions is proud to offer patients bespoke porcelain veneers & crowns by our team of experienced cosmetic dentists and lead ceramist working in our on-site, in-house ceramic studio. With over 50,000+ Smile transformations completed, you can trust our award-winning team at Smile Solutions. Book an Appointment Your browser does not support this video. Preview your smile before committing to any treatment At Smile Solutions, we can provide a physical mock-up using temporary resin applied over your natural teeth to help demonstrate the proposed changes before treatment. This unique approach allows you to feel and visualise the proposed changes in shape, size, length, position, and colour. It also helps you understand your various options, including the number of veneers required and the potential benefits of a gum lift. Through this process, we ensure that you are well-informed about the available treatment options. To experience a mock-up reveal for yourself, get started with a Complimentary Cosmetic Consultation. Book a Complimentary Consultation Please note this appointment is a discussion only and does not include a check-up, x-rays, scans or any other clinical treatment. A \$50 refundable deposit is required to secure the appointment. Video features Dr Ryan Sherry (DEN0002124765) – Registered Dentist, General Registration. This video demonstrates an example of the mockup process. Results may vary, and your dentist will discuss suitability, alternative treatment options, and any associated risks. A mockup is an elective step and your dentist will also review other treatment options if appropriate. More information on treatment considerations can be found here . Why choose Smile Solutions for your porcelain restorations? Individually hand crafted Our in-house, small scale ceramic studio is here only to service our patients. Our Ceramists do not work with any other businesses beyond Smile Solutions, allowing them to dedicate all their time to creating the very best work for our own patients. Meet the creator of your new smile During your initial appointment, and throughout your treatment journey, you will have the opportunity to meet and consult with our lead ceramist who will craft your new smile. No faceless person, off-site, or overseas providers, our ceramists work on-site, in their dedicated ceramic studio, and will work with you each step of the way. Quick turnaround without compromising quality We don't offer prefabricated, cookie-cutter smiles. Our superior technology including iTero scanners, 3Shape Trios scanners and fleet of 3D printers allows our work to be compressed to a one-day turn around. Our bespoke, small-scale operation at our in-house ceramic

studio gives our team of master ceramists the ability to devote their time specifically to creating your new smile. Preview your smile with a mockup At Smile Solutions, we understand how important it is to feel comfortable before committing to treatment. That's why we offer a reversible, no-obligation preview of your new smile through a physical mock-up using temporary resin placed over your natural teeth. This gentle, hands-on approach lets you see and feel the potential transformation — from changes in shape, size and length to adjustments in position and colour. It's a chance to explore what's possible, understand your options, and discover whether veneers, a gum lift, or other treatments could help you achieve the smile you've been imagining. Technologically advanced practice At Smile Solutions, we incorporate advances in dental technologies and processes to support patient care. Our clinicians have access to a range of technologies to assist with diagnosis, treatment planning, and delivery of care. These include Dental Monitoring, iTero scanners, 3Shape Trios digital scanners, digital radiographs and CT scans, a fleet of CEREC machines and intraoral scanners, as well as an in-house dental laboratory and bespoke ceramic studio equipped with 3D printers. A calm, beautiful treatment environment Relax in our emotionally serene practice and spacious dental suites, with breathtaking views across Melbourne, creating a comforting, stress-free experience from start to finish. Trusted by over 250,000 patients All photos and videos are shared with full patient consent. No filters, AI alterations, or unrealistic lighting have been applied. Results, recovery times and potential risks vary for each individual and procedure. The information provided here is general in nature and intended for those over the age of 18. Undergoing any dental or cosmetic procedure is a significant decision, and patients should seek independent advice from a qualified, AHPRA-registered practitioner before proceeding. Further details about this procedure, including potential risks, can be found here . View More Smiles What is the process? 1 Our 60-minute cosmetic consultation gives you the chance to discuss your smile concerns and goals with a experienced Treatment Consultant. Together, you'll explore the treatment options best suited to your case, along with the pricing and flexible payment plans available to help you achieve your new smile with our award-winning dentists and specialists. Discuss your smile concerns, goals, and expectations so we can understand what a perfect smile means to you. This might include changing the shape, shade, or alignment of your teeth, or replacing cracked, chipped, or missing teeth. 2 Should you choose to proceed with your treatment, digital scans will be taken and sent over to our Master Ceramist and his team at our on-site ceramic studio. During this appointment you will have the opportunity to customise and discuss your smile design with your clinician and ceramist. Most importantly, your treating clinician will assess and address the general health of your teeth with a comprehensive examination and clean prior to the commencement of any cosmetic treatment, to ensure the best outcome. 3 Once your smile design is complete, our cosmetic dentists will insert your temporary veneers, allowing you to see how they will look. You will have the opportunity to provide input on the shape, colour and any other characteristics of

your new smile, before our Ceramist starts working on your final veneers. Our in-house studio is here only to service our patients. Our Ceramists do not work with any other businesses, allowing them to dedicate all their time to creating the very best work for our patients. 4 Our team of ceramists carefully handcraft your bespoke Porcelain Veneers from the finest quality porcelain in our in-house ceramics studio. We don't offer prefabricated, cookie-cutter smiles. Once your final veneers are made, your temporary veneers will be removed and you will try in your final veneers. You will have another opportunity to make any final adjustments, and once you are happy, your final porcelain veneers will be permanently and expertly bonded to your teeth. Over 30 years of award-winning service [Frequently Asked Questions](#) What's the difference between a porcelain veneer and a porcelain crown? A veneer is a thin, custom-made shell that covers just the front surface of a tooth, helping to improve its shape, colour, or alignment. A crown, in contrast, covers the entire tooth, providing both cosmetic improvement and added strength, making it ideal for teeth that are weakened, worn, or heavily restored. What is the difference between porcelain and composite veneers? Porcelain veneers are a thin, custom-made shell that covers just the front surface of a tooth, helping to improve its shape, colour, or alignment. Composite veneers are made from a tooth-coloured resin material that is applied directly to the tooth. They can be used to make small to moderate changes in shape, repair chips or cracks, correct misalignment or unevenness, improve discolouration or wear, and close small gaps between teeth. Composite veneers are typically made and fitted in a single visit, as they are crafted in-house without the need for a dental laboratory. How long do veneers and crowns last? Veneers are a durable option to enhance both the appearance and function of your teeth, typically lasting between 10 and 25 years. While ceramic veneers are strong and resistant to breaking, they can chip or fracture if subjected to trauma or excessive force, similar to natural teeth. Veneers can also wear or become damaged over time, particularly if you grind or clench your teeth. Their appearance should remain excellent indefinitely, though you may choose to replace them if gum recession exposes the edges or staining occurs. It's rare for a veneer to detach, but this can happen if bonding is compromised, suggesting a crown may have been more appropriate, or, less commonly, due to a materials or handling issue. Crowns, on the other hand, cover the entire tooth and, like veneers, can still be subject to fracture or decay. With proper oral hygiene and regular dental check-ups, crowns can last many years. The material used affects their durability, but other factors—such as aesthetics, longevity, and how they interact with opposing teeth—are also important to consider. Discussing the options with your dentist will help ensure you choose the most suitable solution for your smile. What is the cost of porcelain veneers and crowns? It's important to understand that the cost of any dental treatment can vary between patients, depending on the complexity of the procedure, and who performs the treatment. No two mouths are the same, and so dentists will not necessarily be able to give you an exact cost until they have thoroughly examined your teeth. Although veneers might be considered expensive, with porcelain veneers costing more than composite veneers, patients are usually very satisfied with the results and admit that the benefits, such as improved aesthetics and (in the case of porcelain) a stronger material far outweigh the cost. There are a few different costs involved with veneers, from the X-rays to the process of bonding the veneers and the cost of the material itself. How do I choose between composite veneers and porcelain veneers? Choosing between composite and porcelain veneers depends on your individual goals, budget, and the outcome you hope to achieve. The best option for you can be determined through a thorough assessment and discussion with your dentist, who will consider your teeth, bite, and desired results. Composite veneers are applied directly to your teeth using a process called dental bonding (the same method used for composite fillings). They can usually be completed in a single visit and are more affordable upfront. However, composite veneers are not as strong as porcelain, are slightly porous, and require regular maintenance. Over time, they can lose their lustre or discolour, which may require polishing or replacement, adding to long-term costs. Porcelain veneers are more durable and natural-looking, resist staining, and require less maintenance, making them a cost-effective option over time. They are custom-made, either in a dental laboratory or chair-side, and are usually placed during a second visit after your initial consultation. Ultimately, your clinician will guide you on which option best suits your teeth, lifestyle, and smile goals to ensure the most predictable and lasting results. How do I care for my veneers and crowns? Your clinician will advise you on any special care requirements for your new restorations, as

well as any follow-up appointments needed to monitor your progress. Maintaining a good dental hygiene routine, including brushing twice a day, flossing, and regular scale and clean appointments with your dental hygienist, is essential. While the porcelain or composite used in veneers cannot decay, the underlying teeth can still be affected, particularly at the exposed edges or where the veneer joins the natural tooth. Veneers can help protect your teeth from decay, especially when used alongside fluoride toothpaste and mouthwash. Crowns function like natural teeth and are very durable, but they also require proper care. Brushing and flossing around the crown, along with regular dental check-ups and the use of remineralising toothpaste, helps minimise the risk of decay and ensures your restoration lasts as long as possible. Are you considering porcelain veneers? If you are interested in understanding how to improve your smile with cosmetic dentistry, our complimentary Design Your Smile consultation has been designed with you in mind. You will meet with our experienced treatment coordinator to discuss the options available to you based on your individual expectations and budget. By visualising how your final smile will actually look within this complimentary consultation, you will be well placed to make the right treatment decision. Are you ready to build your dream smile?
