There are many adults who assume that they're too old for orthodontic treatment or that they won't achieve a good result with Invisalign as an adult. Or they simply wonder if they should even bother? Having crowded teeth, bite issues, jaw misalignment and spacing can all impact greatly on your dental health both now and in the future. Dental decay, gum disease, uneven wear and dental trauma can be the result of orthodontic malalignment and can all be address using Invisalign. Invisalign is a great orthodontic option for adults who are wanting to improve the alignment of their teeth for cosmetic reasons, functionality, or both. Having straight teeth can go a long way to improve your self-esteem and confidence, and while many adults may want straight teeth, they don't want to have to deal with braces, which is why having Invisalign as an adult can certainly be worth it. Invisalign can often give you the same results as traditional braces, in a more comfortable and less obvious way. Invisalign is very adaptable to your lifestyle, all you need to do is take out your aligners while you eat, drink, or clean your teeth. Invisalign is comfortable, easy to take out and put back in, and cleaning your teeth is not impacted as you can brush and floss like normal. It's never too late to have the smile you've always wanted, and Invisalign is the perfection option for adults to achieve their ideal smile and drastically improve their oral health.
