Temporary filling management There are a number of reasons why your dentist may have placed a temporary filling. It may be to settle a painful tooth, to seal a tooth that is in the process of having root canal treatment or to act as an interim filling until such time as a crown or a CEREC® porcelain restoration can be placed. Temporary fillings aren't designed to last, so it's not unusual for them to fall out. If you do lose a temporary filling prematurely there are a few things to consider. Firstly, call your dentist for a prompt appointment. The lost filling should be replaced as soon as possible. Secondly, make sure you keep the area clean with thorough brushing, flossing and rinsing. Food caught in the space where the filling used to be can result in the accumulation of harmful bacteria, which can lead to further dental problems.
