The conservative finishing touch after Invisalign Treatment: Invisalign followed by composite bonding. After image taken: approx. 2 weeks post procedure. Enhancing the final result of Invisalign When your Invisalign treatment is complete and your teeth are beautifully aligned, there is one more step that can take your smile from straight to truly polished. Edge work composite bonding is a gentle, minimally invasive procedure that refines the edges of your teeth – addressing small asymmetries, worn edges, or subtle imperfections that become more visible once alignment is achieved. At Smile Solutions, this is not simply an add-on service. It is a carefully planned, collaborative step in a complete smile journey – coordinated from day one between our specialist orthodontists and experienced cosmetic dentists, all under one roof. Treatment: Invisalign followed by composite bonding. After image taken: approx. 2 weeks post procedure. Why choose edge work bonding? Many patients choose Invisalign over porcelain veneers precisely because they want to protect their natural teeth and avoid unnecessary intervention. Edge work composite bonding honours that choice completely. – No natural tooth structure is shaved down or cut – the procedure builds up, not down – Far less expensive than porcelain veneers – Conservative and minimalistic – your teeth remain your teeth – Can create a polished, refined look or a subtler, more natural improvement – entirely up to you – Combined with professional whitening, it delivers a beautiful, complete result without any invasive procedures Your complete smile journey, from your very first visit to your finished smile and ongoing care. 1 Complimentary Check-Up and X-Rays Every orthodontic patient at Smile Solutions receives a complimentary initial check-up and x-rays as part of their Invisalign journey. This ensures your treatment begins with a complete clinical picture – and there are no surprises along the way. 2 Hygiene Program Throughout Treatment From the beginning of your Invisalign treatment, you are enrolled in our dedicated hygiene program. Our experienced dental hygienists ensure your teeth and gums remain in excellent health throughout the alignment process – because a healthy foundation is essential to a lasting result. 3 Invisalign Treatment with a Specialist Orthodontist Your Invisalign treatment is carried out by one of our board-registered specialist orthodontists. Our specialist orthodontists carefully plan every aspect of tooth alignment to achieve a balanced, functional, and aesthetically pleasing result. Treatment is designed to broaden and align the dental arches, eliminate crowding, establish a healthy bite with ideal overbite and overjet, and precisely position each tooth, including subtle extrusion and intrusion, to create even, harmonious incisal edges. 4 Complimentary Cosmetic Consultation As your

Trusted by over 250,000 patients All photos and videos are shared with full patient consent. No filters, AI alterations, or unrealistic lighting have been applied. Results, recovery times and potential risks vary for each individual and procedure. The information provided here is general in nature and intended for those over the age of 18. Undergoing any dental or cosmetic procedure is a significant decision, and patients should seek independent advice from a qualified, AHPRA-registered practitioner before proceeding. Further details about this procedure, including potential risks, can be found here . View More Smiles Flexible Payment Plan Options Available Learn More Over 30 years of award-winning service Frequently Asked Questions Is edge work bonding right for me? It is ideal for patients who have completed Invisalign or orthodontic treatment and want a polished, refined finish without the invasiveness of porcelain veneers. If you have minor edge asymmetries, worn edges, or subtle imperfections that are more visible now your teeth are straight, edge work bonding may be the perfect solution. Does it hurt? The procedure is gentle and minimally invasive. In most cases, no anaesthetic is required. How long does it take? The procedure is typically completed in a single appointment of 1-2 hours. Will it look natural? The composite resin is carefully colour-matched to your whitened teeth. The result is subtle, natural, and designed to enhance your smile rather than transform it. Can I see what it will look like before committing? Yes. A resin mock-up is created at your complimentary cosmetic consultation – non-bonded resin is placed on your teeth so you can see and approve the proposed result before any bonding is permanently applied. You are always in control. What if I want to replace the bonding later? Replacement is simple. The old composite is removed and new material is applied in a single visit. There is no damage to your natural tooth structure. How much does edge work composite bonding cost? The cost of edge work composite bonding depends on the number of teeth being treated and the complexity of the work required. As a guide, treatment starts from \$500 per upper tooth for minimal bonding, while more elaborate upper tooth bonding typically ranges from \$750 to \$950 per tooth. Lower teeth are generally around \$550 per tooth. Any recontouring of adjacent teeth is included as part of your treatment. Your complimentary cosmetic consultation allows your dentist to assess your smile, discuss your goals, and provide a personalised treatment plan and quotation. If you're an Invisalign pricing package patient, professional teeth whitening is also included at no additional cost. Flexible payment plans are available. Contact Us
