Our complimentary consultation is designed specifically for patients who want to improve the appearance of their smile, but don't quite know where to start. The one-hour consultation with our highly experienced treatment coordinator offers a personalised approach to understanding your options. With a wealth of clinical knowledge and information about veneers , crowns , Invisalign , teeth whitening and dental implants , your treatment coordinator will discuss the options available to you based on your individual expectations and budget. Book an Appointment Please note this appointment is a discussion only and does not include a check-up, x-rays, scans or any other clinical treatment. A \$50 refundable deposit is required to secure the appointment. Your browser does not support this video. How does it work? During your smile consultation, your treatment coordinator will firstly seek to understand your current smile concerns and what a perfect smile means to you. This could include changing the shape, shade or alignment of your teeth, or replacing cracked, chipped or missing teeth. After you've discussed your ideal smile, photos are taken of your mouth, to give us a better understanding of how your teeth, gums, lips and face all work together in motion. These images are used to w and design your new smile using innovative techniques and the latest in visual technology. If you decide to proceed with any cosmetic treatment, your treatment coordinator will refer you to the appropriate dentist or specialist for a full exam and treatment discussion. What are the benefits of a smile consultation? The complimentary smile consultation at Smile Solutions allows you to consider the cosmetic options available to you based on your individual case and needs before making any serious commitments. Patients often request a specific dental procedure because they've seen it on someone else, on TV or online. In reality, we are all different and what works for one person may not necessarily be the right treatment for another. Furthermore, in dentistry there is usually more than one way to get the desired outcome depending on your expectations, commitment and budget.
