orthodontics Invisalign® No Braces Smile Solutions is Australia's largest specialist provider of Invisalign® since 2012! The virtually clear alternative to braces Invisalign® is a modern orthodontic treatment that uses a series of clear, removable aligners to gradually straighten teeth. Unlike traditional metal braces, Invisalign® aligners are nearly invisible and can be taken out for eating, brushing, and flossing. Each set of aligners is custom-made to fit the patient's teeth and is typically worn for about two weeks before being replaced by the next set in the series. Start your journey to straighter teeth Book Now Why choose Smile Solutions for your Invisalign® treatment? Treatment by an on-site registered specialist orthodontist At Smile Solutions your treatment will be carried out by one of our registered specialist orthodontists, not a general dentist. Specialist orthodontists complete a university postgraduate degree specialising in tooth and jaw correction and these specialists will assess your suitability for Invisalign and perform your treatment. Premium Invisalign® No Braces Aligners We only use premium Invisalign® aligners, no cheap alternative brands. Invisalign premium aligners are made from proprietary SmartTrack material, offering comfort, fitting snug around your teeth, and are virtually invisible. Massive list of inclusions Our Invisalign® packages include all necessary consultations, treatment delivered by a specialist orthodontist, a 3D iTero scan with a customised treatment plan, full clinical photographic records and study models, and all certified Invisalign aligners and attachments. At the end of treatment, you'll receive both upper and lower Vivera retainers to maintain your results, plus your choice of complimentary Zoom! in-chair whitening or professional take home whitening kit for treatments paid in full or through a payment plan with a deposit of \$2,000 or more. Technologically advanced practice All our clinicians have access to the most superior technology available, including Dental Monitoring, iTero digital scanners, Digital Radiographs & CT Scans, as well as an in-house dental laboratory equipped with a 3D printer, to ensure careful diagnosis, treatment planning and delivery of care for our patients. Spectacular location During your Invisalign® treatment at Smile Solutions you will also enjoy some of the best views of Melbourne from the peak of the lovingly restored orthodontic tower in the centrally located in the iconic Manchester Unity Building. Free Consultations, Interest Free Payment Plans & Price Match Guarantee Following your complimentary consultation with one of our experienced treatment coordinators, you will receive an estimated quote detailing all anticipated costs before proceeding so you are completely aware of all the fees, appointments and aligners for the duration of your Invisalign® treatment. We offer no deposit interest free payment plans for your

Invisalign® treatment, allowing patients to pay off their treatment in easy fortnightly instalments, with a low establishment fee and a simple application process. We will also price match any written quote for identical treatment prescribed by an Australian Dental Board -registered specialist orthodontist. Get started Please note your complimentary appointment is a discussion only and does not include a check-up, x-rays, scans or any other clinical treatment. A \$50 refundable deposit is required to secure the appointment. Alternatively, you can book straight in with one of our Specialist Orthodontists for a fee of \$100. What can Invisalign® treatment fix? Crafting a smile as unique as you 43654 Porcelain Veneers & Crowns 8892 Completed Invisalign Cases 205987 Patients at Smile Solutions Real patients, real results Trusted by over 250,000 patients All photos and videos are shared with full patient consent. Flexible Payment Plan Options Available Learn More Over 30 years of award-winning service Frequently Asked Questions How do I know if I am a suitable candidate for Invisalign? Invisalign can address most but not all teeth straightening concerns. To ascertain your suitability for orthodontic treatment with Invisalign, Smile Solutions offers a free Invisalign consultation. At this appointment we will assess your suitability for Invisalign and determine what treatment is best for your individual case. You will receive a comprehensive quote and treatment plan and you'll even get to see a projection of what your smile will look like at the end. What are the different types of Invisalign? Invisalign Comprehensive (unlimited aligners) Suitable for moderate to severe crowding/spacing. Invisalign Moderate (Up to 20 aligners) For patients needing mild to moderate orthodontic alignment. Invisalign Lite (Up to 14 aligners) Suited to patients needing minor orthodontic alignment. Invisalign Express (Up to 7 aligners) Suited to patients with a relapse after braces from a younger age or very mild movement requirements. Will I still need retainers on completion of Invisalign treatment and is this an extra cost? Yes, you will require retainers to keep your teeth in position; but no, there is no additional charge for these at Smile Solutions. We include this cost when we quote up front for all treatment, appointments and aligners. Is Invisalign painful? Invisalign is generally less painful than traditional braces, as it uses smooth plastic aligners that are custom-fitted to your teeth. While some patients may experience mild discomfort when switching to a new set of aligners, this is usually temporary and indicates that the teeth are moving as intended. Many people find Invisalign to be a more comfortable and convenient option for straightening their teeth without the sharp edges and irritation often associated with metal braces. Can I claim Invisalign treatment on my private health insurance? If you have orthodontic cover as part of your health insurance policy, your Invisalign treatment may be covered. Several health funds will provide a rebate only when a specialist orthodontist carries out the treatment. We suggest you check with your health fund as policies differ from fund to fund. I've had orthodontic treatment before and don't like how my teeth look. Can I still have Invisalign? Yes. Most people who have had orthodontic treatment and are not completely happy are eligible for Invisalign treatment. In many cases the

treatment is shorter and cheaper. Why see a specialist orthodontist rather than a general dentist for my Invisalign? Specialist orthodontists have three to four years of additional education and training in the specific field of orthodontics, which qualifies them for registration with the Dental Board of Australia as a specialist. Seeing a specialist orthodontist means you receive specialist care by a highly trained expert. How do I clean and care for my aligners? It is best to clean your aligners before each insertion. This can be done using cold water and a toothbrush (without toothpaste). Soaking aligners in cool water and vinegar or Retainer Brite will remove any stains or debris (other than gum). Simply place your aligners in a cup of water and add one tablet of Retainer Brite, which will turn the water blue. Once the water is clear again, your aligners will be too! Rinse them thoroughly in cold water before re-inserting. It is best to clean your aligners while they are out during mealtimes, to avoid extra time out of the mouth. Do not use warm or hot water, denture cleaners or mouthwash as these will distort the aligners. When taking your aligners out to eat or drink, remember to store them in the protective box provided. Avoid placing them in tissue or your pockets to prevent accidentally damaging or discarding them. Will Invisalign affect my speech? The vast majority of patients report no effect at all on their speech. However, as with traditional orthodontic appliances, having something new in your mouth brings an initial adjustment period. Are there restrictions on what I can eat during Invisalign treatment? As you remove your aligners to eat or drink anything other than cold water, there are no restrictions on what you can eat and drink. Removing your aligners to eat prevents staining, the formation of cavities and disfigurement of the aligners due to heat. We recommend you brush and floss your teeth after each meal before reinserting the aligners. Do not chew any kind of gum with your aligners in place; gum sticks to aligners and is difficult to remove other than with an extra visit to the dentist. What happens if I lose my aligners? Replacement aligners can be purchased for \$100 per set. How often must I see my orthodontist during Invisalign treatment? You will need to visit your orthodontist every six to eight weeks for a progress review and to collect your next set of aligners. The cost of these appointments is included in your treatment plan. How often do Invisalign aligners have to be worn? Aligners should be worn all the time – day and night – with the exception of when you remove them to eat, brush and floss your teeth or if you remove them for special occasions. As a guide, you should wear your aligners for at least 22 hours per day. How long will Invisalign treatment take? The time taken to complete treatment depends on the complexity of your orthodontic needs, but the average is 12 to 18 months. After a consultation with one of our specialist orthodontists, you will receive a full treatment outline. This will give you an approximate timeframe, including the time required for any general dental work in preparation for your Invisalign treatment. Meet our Specialist Orthodontists At Smile Solutions your Invisalign® treatment will be carried out by one of our board-registered specialist orthodontists. Specialist orthodontists complete a postgraduate university degree specialising in tooth and jaw correction and these are the clinicians who will assess your suitability for Invisalign® and perform your treatment. You can have complete confidence in the care you receive and the final outcome.
