Exclusively Made in Melbourne Our in-house Dental Laboratory at Smile Solutions is exclusively dedicated to serving our patients and does not work with any other businesses. Our team of ceramists, dental technicians, and dental prosthetists leverage advanced technology and collaborate closely with our dentists and specialists to produce high-quality appliances, prosthodontic products, and meticulously handcrafted porcelain veneers and crowns. By focusing exclusively on serving Smile Solutions patients, the laboratory can dedicate all its efforts to providing highly personalised care. What does our laboratory manufacture? Porcelain Restorations Dental Implants Orthodontic Appliances Sports Mouthguard Whitening Trays Specialty Splints Porcelain Restorations Dental Implants Orthodontic Appliances Sports Mouthguard Whitening Trays Specialty Splints Porcelain Restorations Dental Implants Orthodontic Appliances Sports Mouthguard Whitening Trays Specialty Splints What are the benefits of having an in-house lab? Quality materials & technology At Smile Solutions, we continually pioneer new technologies to deliver exceptional treatment and outcomes for our patients. Our advanced laboratory technology is tailored to specific treatment methods, and we utilise only the highest-quality brands and materials to guarantee the best results possible. Meet the creator of your new smile During your initial appointment, and throughout your treatment journey, you will have the opportunity to meet and consult with our lead ceramist who will craft your new smile. No faceless person, off-site, or overseas providers, our ceramists work on-site, in their dedicated bespoke ceramic studio, and will work with you each step of the way. Quick turnaround without compromising quality We don't offer prefabricated, cookie-cutter smiles. Our high quality technology including iTero scanners, 3Shape Trios scanners and fleet of 3D printers allow our work to be compressed to a one-day turn around. Our bespoke, small-scale operation at our in-house ceramic studio gives our team of lead ceramists the ability to devote their day specifically to creating your new smile. Your browser does not support this video. Preview your smile makeover before committing to any treatment At Smile Solutions we provide a reversible preview of a smile makeover through a physical mock-up using temporary resin applied over your natural teeth. This unique approach allows you to feel and visualise the proposed changes in shape, size, length, position, and colour. It also helps you understand your various options, including the number of veneers required and the potential benefits of a gum lift. Through this process, we ensure that you are well-informed about the available treatment options. To experience a mock-up reveal for yourself, get started with a

Complimentary Cosmetic Consultation. Book a Consultation Video features Dr Ryan Sherry (DEN0002124765) – Registered Dentist, General Registration. This video demonstrates an example of the mockup process. Results may vary, and your dentist will discuss suitability, alternative treatment options, and any associated risks. A mockup is an elective step and your dentist will also review other treatment options if appropriate. More information on treatment considerations can be found here . Multi-layering technique for porcelain veneers We pride ourselves on offering the advanced multi-layering technique for porcelain veneers. This method involves meticulously applying several thin layers of porcelain to craft veneers that closely mimic the natural enamel and dentin of your teeth. The attention to intricate details, such as translucency, colour, and texture, ensures that your veneers blend seamlessly with your natural teeth, providing a beautifully natural and long-lasting smile. You can trust our team to deliver exceptional aesthetic results with the highest level of precision and care. View our before & after gallery

Custom hand crafted veneers are a thin sheet of porcelain used to beautify the aesthetics of the tooth in both colour and shape. Always follow the directions or use. All photos and videos are shared with full patient consent. No filters, AI alterations, or unrealistic lighting have been applied. Results, recovery times and potential risks vary for each individual and procedure. The information provided here is general in nature and intended for those over the age of 18. Undergoing any dental or cosmetic procedure is a significant decision, and patients should seek independent advice from a qualified, AHPRA-registered practitioner before proceeding. Further details about this procedure, including potential risks, are available here . Meet our laboratory team

Exocad DentalCAD Software Exocad for dental implants is an innovative software solution that simplifies the process of designing and creating implant restorations. With its user-friendly interface and advanced features, Exocad allows clinicians to plan and visualise implant placement with precision, customise prosthetic components, and streamline workflow efficiency. Exocad facilitates accurate treatment planning and more predictable outcomes.

E4 Lab Scanner The E4 Lab Scanner at Smile Solutions is renowned for its advanced capabilities in generating highly accurate digital impressions for dental restorations. Its efficient workflow and precise detailing ensure superior fit and aesthetics, enhancing both patient satisfaction and treatment efficiency.

Arum 5-Axis wet/dry milling machines Arum 5-Axis wet/dry milling machines are advanced devices used for precise cutting and shaping of dental materials. Their benefits include high accuracy, versatility in handling various materials, and the ability to perform both wet and dry milling for optimal results.

Dentaurum Laser Welder At Smile Solutions, our dental technicians have access to the Dentaurum Laser Welder, a sophisticated welding device used in the making of metal frameworks for dentures and orthodontic appliances. It uses laser technology to generate a concentrated beam of energy, which melts and fuses metal surfaces together with exceptional accuracy and control. This welding process results in strong, durable joints without the need for additional adjustments, ensuring high-quality appliances.

Otoflash Flash Curing Device The Otoflash Flash Curing Device is a sophisticated piece of equipment used in our Smile Solutions dental lab for the fast and efficient curing of dental materials, particularly those used in the fabrication of prosthetic restorations like crowns, bridges, and veneers. Using advanced light-curing technology, the Otoflash emits intense light to cure resin-based materials quickly and effectively, ensuring optimal durability. Its precise control settings and customisable features make it a versatile tool for dental technicians, enabling them to achieve consistent results while reducing processing times.

3D Printers Asiga Max The Asiga Max is a compact and versatile 3D printer designed for dental applications, using DLP (Digital Light Processing) technology for high-precision prints. It allows users to choose from a wide range of materials for various applications, enhancing flexibility and cost-efficiency. DLP works by using a digital projector to flash a single image of each layer, curing the

resin with light for fast and detailed prints. Asiga Pro Max 4K UV 3D The Asiga Pro Max 4K UV 3D printer is a high-resolution 3D printing device designed for dental and medical applications, featuring a 4K UV LED light source for precise and detailed prints. It is highly regarded for its exceptional accuracy, reliability, and user-friendly interface, making it ideal for producing high-quality dental models and appliances.

Erkopress The Erkopress is an advanced vacuum forming machine used in dentistry to create high-quality custom dental appliances, such as retainers, mouthguards, and bleaching trays. It offers precise and consistent pressure for accurate, well-fitted appliances that ensure better comfort and effectiveness for patients. Its efficiency reduces production time, making it a valuable tool for both our clinicians and patients.

Mock-up Reveal At Smile Solutions you can preview your smile makeover before committing to any treatment. This starts with a digital reveal on a large screen with our master ceramist. Then your cosmetic dentist fabricates a physical mock-up on your teeth made from a temporary resin over the top of your natural teeth. The process is completely reversible causing no harm to any of your natural teeth. With a mock-up reveal, patients can: View and feel the proposed changes of teeth shape, size, length, position and colour. Preview their options such as how many veneers and whether a gum lift will prove beneficial, allowing you to be fully informed in their treatment options. Meet our in-house Master Ceramist and experienced cosmetic dentist to ensure they are completely comfortable with the creators of your new smile. Click here to see how it works!
